

Challenge Cards - TCS Finland Immersion Day

1. Responsible AI at Scale (Banking & Regulated Industries)

Target Account: OP Pohjola

Challenge

How do we scale AI across customer and employee journeys while ensuring **trust, compliance, and measurable business value**?

Context

- AI-first strategy with AI assistants already live
- Rising ICT spend (cybersecurity + data protection)
- Strong regulatory pressure (ESG, CSRD, fraud risk)

Tension

Speed of AI innovation vs. **regulatory risk, auditability, and customer trust**

Opportunity Angle

Build a **bank-grade AI operating model** (governance + platform + value tracking)

Success Metric

- Reduced fraud losses
 - Improved cost-to-income ratio
 - Faster AI deployment cycles
-

2. Post-Transformation Value Realization (Capital Markets Infra)

Target Account: Euroclear Finland

Challenge

After major platform modernization (T2S), how do we **unlock sustained efficiency and reduce ecosystem friction**?

Context

- T2S migration completed
- Unified platform (TCS BaNCS)
- High operational complexity across market participants

Tension

Modern platform exists, but **manual exceptions + participant friction still persist**

Opportunity Angle

Drive “**next-horizon efficiency**” via automation, observability, and data services

Success Metric

- Reduced settlement failures
 - Lower cost-to-serve for participants
 - Faster onboarding and processing
-

3. Digital Core Modernization Without Business Disruption (Retail)

Target Account: Kesko

Challenge

How do we modernize SAP + digital core while ensuring **zero disruption to stores, logistics, and customer experience**?

Context

- Largest IT transformation in company history
- Multi-partner ecosystem
- Strong push on AI, personalization, and automation

Tension

Transformation scale vs. **day-to-day retail execution stability**

Opportunity Angle

Build an **AI-powered digital core** (SAP S/4 + data + AIOps)

Success Metric

- Reduced waste and stockouts
 - Improved availability and fulfillment
 - Faster time-to-market for features
-

4. Cloud Transformation with Reliability & Cost Discipline (Telecom)

Target Account: DNA

Challenge

How do we migrate 80% of enterprise apps to cloud while maintaining **telecom-grade reliability and controlling costs**?

Context

- 5-year TCS partnership
- 100+ apps migrating in 24 months
- AI depends on cloud data platform

Tension

Speed of migration vs. **risk of outages, security gaps, and cost overruns**

Opportunity Angle

Establish a **cloud migration factory with control tower + FinOps + AI-ready data platform**

Success Metric

- Reduced run costs
- Improved deployment velocity
- Zero major service disruptions

5. Post-Separation IT & Service Monetization (Industrial / Manufacturing)

Target Account: Kalmar

Challenge

How do we simplify IT post-demerger while enabling **new revenue streams from connected equipment and services**?

Context

- Independent company (post-2024 demerger)
- €50M efficiency target by 2026
- Strong focus on automation, electrification, and digitalization

Tension

Cost reduction vs. **continued innovation and service growth**

Opportunity Angle

Create a **unified digital core + data-driven service platform**

Success Metric

- IT cost reduction
- Increased recurring service revenue
- Faster innovation cycles
